L. FISHER, NEWSPAPER ADVERTISING AGENT, 44 and 46 Merchants Exchange, San Francisco, is authorized agent. This paper is kept on file in his office.

MEMBER ASSOCIATED PRESS.

Published at the Postoffice at Tucson According to Act of Congress and Second-Class Matter.

NEBERT BROWN, - Manager.

A FARMER of Waukesha county, Wis., has picked up several diamonds which are pronounced by experts to be equal to the South African diamonds in every respect. One of them is valued at \$500.

J. W. ALLEN, of Griffith, Ga., dreamed the other night that he was dead. He was 45 years old and in perfect health. The next day he was relating the dream to a friend, when he dropped dead.

Cuba, when it was taken, had a population of \$1,610,000. It could easily support a population of 8,000,000, and under a proper government would be the most charming winter resort in the world.

Miss MABEL KENNEDY, a woman not yet 20 years of age, is the cashier of the Merchants Bank of Forsyth, Mont. She passed on the securities offered, makes the loans, receives the deposits, draws the exchange, and does all the important work of the establishment.

It has been discovered that George Francis Dillon, a Catholic priest of Pittsburgh, has been married since last November to a Miss Donovan, formerly a telegraph operator at Braddock, Pa. They were married by an Episcopal minister at Cumberland, Md.

A WASHINGTON reporter asked Cesar Reed the other day to express himself on the important issues before the country. Mr. Reed replied: "Young man, this promises to be a very lively baseball season," and that is all that could be got out of him.

COUNTING her skirt, belt, shirt-waist and buy hat, a fair estimate of the cost of producing a fine appearing summer girl would be \$4.50. If she puts in all summer at the beach, stays in the water, and strolls herself in the latest fashion, she would not, no doubt \$4.50 is rather too generous a figure (not taking her appetite into account, of course.)

RALPH SKELEY, a New York farmer, advertised for a wife recently, under an assumed name, and received a letter signed "Maggie Sloan" from Dayton, Ohio. Some correspondence followed, and an agreement to wed. He went on to Dayton to claim his bride, and was considerably surprised to find that she was his own sister.

REBBIAN women have become important in the medical world. There are 700 women practicing medicine in the empire, besides a large number of others who occupy medical positions in hospitals and institutions, factories and government establishments. This is in the lightest Russia, which does not seem to be so very far behind the age.

A CHICAGO negro claims to have invented a breeding machine which will breed wheat, oats, etc., with a wisp of the grain, as is done by hand, and dispense with the use of binding twine. A company of negro capitalists is backing the invention. The same negro claims that he was the inventor of the mitral valve, and that it was stolen from him by a Frenchman.

A NEW YORK dentist employs a woman assistant at a salary of \$50 per week and a commission, who goes from house to house and cleans teeth. The charge is fifty cents a "clean" and it is said to be a paying business. Now, if the doctors in Washington could only invent some plan for cleaning the cowboys from some congressional brains, they might, too, soon secure a competency.

Six baby carriages at one fell swoop have been ordered of a London firm for the court of Morocco. They are silver-plated wheels and red Morocco upholstery and are painted in the most gorgeous style. The same firm supplied an Indian prince with a perambulator fitted with a musical box, which plays patriotic airs—British, not Indian—when the carriage moves. This indicates that babies will continue in fashion in the highest circles for many years yet.

A new terror in the water we drink is described in the Medical News. This is the filaria nocturna, which gets into the blood and multiplies there and produces a dreadful disease, with horrible

swelling of the extremities. The natural history of the filaria is really most interesting, and it appears that it is propagated through the agency of mosquitoes, which carry the embryo from the blood of a patient to the water, where they deposit their eggs, and another patient takes the filaria with the water. This is not a fairy tale, but a scientifically ascertained fact. The danger may be remote, but it furnishes another reason for filtration.

FIELD MARSHAL LORD WOLSELEY, commander-in-chief of the British army, was a guest the other night at a dinner given by the London Press Club. Lord Wolseley made a speech, in which he said he did not believe in the happiness of a nation that had no history. He did not hesitate to say he did not believe in universal peace. The man who believed that the time was coming when there would be no war was a dangerous dreamer, especially dangerous if he happened to hold a public position. He hoped that no such man would ever be in the foremost place in public life in Great Britain.

THE way in which McKinley goes on gathering delegates from day to day is calculated to create the impression that the affair is foredoomed.

PRESIDENT CLEVELAND is winning the praise of Spanish statesmen by his inaction in the Cuban affair, even if he is taxing the patience of the American people.

SO FAR about the only willing aspirant for the democratic presidential nomination is Governor Matthews, of Indiana, and his chances are probably the least.

WAGES in Japan are only from 170 to 200 a day, but as this is double the amount paid before modern ideas were adopted, the Japs have reason to be well satisfied with the change.

CHINA handed over to Japan last week \$50,000,000 in indemnity. So much for the economy of a populous nation that fails to provide itself with a sufficient navy.

GOLD is still going abroad at a rate which would alarm President Cleveland if he did not know that the proceeds of the land bonds sold, or a good share of them, were still in the treasury.

THE bond inquiry may not reveal any dishonesty on the part of government officials, but it will emphasize the fact that democratic rule means the borrowing of money to pay ordinary public expenses in a time of peace.

ANOTHER American schooner has succeeded in eluding the vigilance of the customs officers and has sailed for Cuba with a large cargo of arms and ammunition. This will probably call for another Spanish yell of rage.

EDITOR DANA, of the New York Sun, is nearly a monomaniac on the subject of Tilden's defeat by Hayes, and perhaps that is the reason why he is venomous in his attacks upon McKinley. The prospect of another Ohio Methodist in the White House is too much for his nerves.

THE recent cyclones and severe storms in the east have been something terrible. It must be that Arizona's advantages are unknown to the people who inhabit these storm-stricken sections; otherwise we would be overrun with homeseekers.

YELLOW PETER is taking an active part in the war in Cuba, and the list of victims consists largely of unaccompanied Spanish soldiers. Every young Spaniard who falls under the deadly pestilence goes to the grave a martyr to the relentless tyranny of his native land.

SOME ignorant folks have intimated that the "Kentucky" would probably prove a formidable rival to the "Oregon." They certainly are not posted or they would know that their fears are groundless. Who ever heard of anything bearing the name of "Kentucky" taking to water?

TWO HUNDRED THOUSAND tons of wool will be clipped this year in the Argentine Republic. A good share of that will be sent to the American market to be sold in competition with the wool clipped from the backs of American sheep. The wool duty ought to be restored as soon as the next republican congress gets to work.

THE Venezuelan commission holds regular weekly meetings, at which nothing worth mentioning is accomplished, but which serves the salutary purpose, nevertheless, of keeping England reminded that she must not make any further move in the boundary matter without the consent of the United States.

FORCE of habit is a queer thing. The democrats are going ahead and holding presidential candidate just as if they thought there was some possibility of electing him. Perhaps they are just keeping the machinery running to preserve it from rust and decay.

DR. NOYES, of Menard county, Tex., has 2000 acres of cotton land which he irrigates, and says he gets a longer and better staple than can be raised by depending on the weather. Droughts do not worry him, but he hates to see it rain.

ELECTRIC railways have displaced in the United States no less than 275,000 horses, says the Pittsburgh Dispatch. So many horses would require about 125,000 bushels of grain a day to feed them, amounting to 45,000,000 bushels a year. The loss of the commercial demand for this grain has been an enormous loss of transportation tonnage for the railways.

THE man who waited four days in line in order to file on the Red Lake lands in Minnesota, and then jumped through the land office desk, ought to make an ideal corner lot boom for the new Eden of the frozen northwest. A man of his integrity and staying powers would be able to sell land even to a Californian who had been saddened by the ghastly sight of a collapsed boom.

THE Alabama congressman who made a formal denial that he was drunk on the floor of the house would have done well to ignore the newspaper reports that he was recently under the influence of liquor. The only people who probably read the story were his constituents, and to them he could have sent a strong statement for publication. He merely advertised the charge by denying it in the house, especially as his denial was the well-known plea of illness, which covers a multitude of grades of "in-hu-ness."

THE belief that the reading of Gen. Fitz Lee to Cuba as consul general has been some sort of a scheme behind it has been strengthened by the official statement that Mr. Cleveland had requested Mr. Williams to remain in Havana for a time as Gen. Lee's adviser. "Adviser" is good, but Mr. Williams will really be Gen. Lee's interpreter, as he doesn't know a word in Spanish. The new consul general is going to Cuba at once, although he is risking his life in doing so, as the unhealthy season has already opened in Havana and yellow fever is on the increase, so that the Cleveland scheme in which he is being used must soon become visible to the naked eye, and it will excite little surprise in Washington should it turn out to be connected with Mr. Cleveland's candidacy for a third term.

ACCORDING to the St. Louis city directory, just issued, the population of that city is 611,203.

NEARLY a quarter of the inhabitants of New York city are of German birth or parentage.

ON the Menominee river, in Wisconsin, a log boom ten miles long was recently finished. It is said to be the largest single boom in the world.

DR. O'DONNELL, bishop of Raphoe, has directed that Irish be spoken in preaching sermons by all priests wherever in his diocese the population is Irish-speaking.

BOSTON gives notice that no more prize fighting will be allowed there, and that "all of this ilk in the future are to be arrested as disorderly characters."

ALL but three members of the republican national committee are said to favor the nomination of Speaker Reed for vice president. That is a choice which would meet with the approval of the American people.

A FEW years ago Lady Arran invested \$15 to secure employment for some peasant girls in Ireland. From that small beginning she has enabled 300 girls to become self-supporting and to assist their families by knitting.

NORRIS are black ovine "to the stimulating action of solar heat, combined with moisture and an excess of vegetable food, yielding more carbon than can be assimilated, the character being then fixed by heredity." This extraordinary theory appears in a recent geographical school book, bearing the name of Cambridge University.

FIRE broke out recently in a building in the Avenue de Neuilly, just outside the Porte Maillot, one of the gates of Paris, and the Paris firemen were called out. On reaching the gate they found that they could not pass it without a special permit from the Prefect of Police and had to watch the house burn down while some one hunted up to the prefect.

AT first General Weyler gave the Cuban insurgents fifteen days in which to lay down their arms and accept pardon. That time has been extended on different occasions, and now it has been made indefinite. Evidently the revolution is not being crushed as rapidly as Weyler believed it would be crushed.

IN London, a woman named Dyer, recently arrested, has confessed that she killed three hundred babies at so much per head. One would almost imagine that she bore a close relationship to his infernal majesty. Unfortunately there is nothing in any civilized law which will inflict adequate punishment upon such inhuman brutes.

FIFTY Ounce Indiana, of Oklahoma, are taking the Keely cure. This furnishes further evidence that the noblest man is not far behind his white brother when it comes to reform movements.

CHARLESTON, S. C., has now 108 manufacturing industries, employing 5507 people, and turning out annually over \$14,000,000 in products. The growth of republican sentiment in that state has been repaid of late and is likely to be substantial.

THE Illinois Humane Society has decided to prosecute men who carry little children on the handle bars of their bicycles. That is perfectly proper. Of all dangerous practices to which wheelmen are addicted, none is more worthy of condemnation than that.

CHASKA, who married a Washington City belle, has deserted her for his first love, a Sioux squaw. While the forsaken wife, with her small family of little Chaska's, gets some sympathy, she deserves none. A white woman who will so far forget herself as did this roman-cop, deserves even a worse fate than here.

NO DEMOCRATIC statesman has any business to go around the country pretending to be a Man of Destiny unless he is willing to submit his claim to the avowed test. Moreover, to package weighing less than 210 pounds gross will be admitted to the list of competitors.

AMASSADOR BAYARD's remark that the original Archimedian screw was probably a corker screw suggests that the diplomatic diplomat may presently develop into a humorist. Mr. Bayard has been doing funny things for so long that he has evidently resolved to say some also.

PRESIDENT CLEVELAND, by his cowardly evasion of the Cuban issue, is piling up trouble for great stacks for the Chicago convention. The gathering will see the unpleasant alternative of having to condemn his policy or to incite the country by endorsing it.

THE Cuban resolutions have been in the hands of Mr. Cleveland for more than five weeks, and as yet they have received no attention. It is as yet uncertain whether Mr. Cleveland's inaction in the matter is intended as a mark of his indifference to Cuba or as an expression of his overshadowing contempt for congress.

SECRETARY LAMONT is on his way home from the Canadian angling expedition, and while he probably has a number of eye-oppers on tap in the way of fish stories, he is too shrewd a politician to spring any in a cabinet meeting that exceed those related by his master. The king has the right of way always.

K OF P Grand Lodge. The delegates to the meeting of the Knights of Pythias Grand Lodge in Prescott have returned, and are more than pleased with the treatment accorded them, not only by the lodge but by the people of Prescott as well. They were in Prescott three or four days, and the lodge, as a body, took a trip to Kingman, Mohave county. Tucson was honored by the appointment of three of her members to the best offices in the gift of the grand lodge. Such men as Harry Draehman, Fred Fleischman and L. B. Hayes are recognized wherever they go, as men of sterling worth and ability.

THE following are the officers appointed: Fred Fleischman, Past G. C. O. D. M. Gaddis, Grand Chancellor. L. B. Hayes, Grand Vice-Chancellor. J. H. Hooker, Grand Scribe. Harry Draehman, G. K. of R. & S. G. H. Cobble, Grand M. of E. A. J. Knobel, Grand M. of A. J. Duke, Grand I. G. A. E. Brown, Grand O. S.

A NOGALES SCHEMER. Judge Charles Meyers of Tucson, Ariz., is visiting Los Angeles for the first time in twenty years. He daily calls on Baliff Appel at the police station and the two old timers enjoy life talking over the good days in the territory when times were lively and the railroad had not come west of El Paso.

Judge Meyers has traveled extensively and is well known throughout Arizona where he has been a store that exacts a toll of the traveler. He is a brave and fearless officer as well as an able justice of the peace. Speaking of the amusing things to be found along the southern border, the judge this morning told how a saloon man named Brawlwater avoided the laws of two governments and helps his customers do the same. At Nogales Brawlwater has built a store that exactly straddles the boundary line between the United States and Mexico, the line dividing the counter. The American customer wants to sample in cigars can step to the south end of the counter and get them, while the Mexican can see to the north end and buy his demijohn of double distilled in America.

"The New Bohemian." Attention is called to the marked improvement shown in the May number of The New Bohemian. This magazine has recently undergone a change of ownership and its present managers will enlarge and improve it until it shall be a standard in quality as well as size. The present number has been increased sixteen pages, and as many more will be added to each issue for several months.

THE new departments have been introduced: "The Passing Show" and "The Border of the South," more attention is also given to book reviews and periodical notices. This magazine well deserves liberal patronage, and if you desire to add something of value to an interesting literary collection, you cannot do better than select "The New Bohemian."

How to Treat a Wife. From Pacific Health Journal. First, get a wife; second, be patient. You may have great trials and perplexities in your business, but do not, therefore, carry to your home a cloudy or contracted brow. Your wife may have trials, which, though of less magnitude, may be hard for her to bear. A kind word, a tender word, will do wonders in chasing from her brow all clouds of gloom. To this we would add always keep a bottle of Chamberlain's Cough Remedy in the house. It is the best and sure to be needed sooner or later.

The "Border of the South," more attention is also given to book reviews and periodical notices. This magazine well deserves liberal patronage, and if you desire to add something of value to an interesting literary collection, you cannot do better than select "The New Bohemian."

DIED LAUGHING.

A Humorous Remark Results in the Death of a Woman.

QUEEN'S BIRTHDAY

Celebrated in London—Cause of Missionary Riots.

OAKLAND, Cal., May 20.—Mrs. Louise Speetzen laughed so heartily at a humorous remark made at a whist party she was attending last Friday night, that she ruptured a blood vessel in the abdomen. She died last night.

LONDON, May 20.—The official celebration of the Queen's birthday, which occurs Sunday, took place throughout the country and the empire in general. On the parade ground of the horse guards there was an unusual ceremony of trooping colors witnessed by a large crowd of distinguished people, including the Prince and Princess of Wales, Prince Charles of Denmark and Commander in Chief Lord Wolseley. The queen was born May 24, 1819. The attractiveness of the ceremony was marred by rain.

SHANGHAI, May 20.—Details regarding the anti-missionary riots at Kiang Yin, May 12, during which a mission was looted, show that the disturbance was caused by the admission of a native child to the hospital. The mob demanded the child and upon the refusal of the missionaries to give it up, wrecked the mission buildings, many of which were American property. The missionaries escaped.

AMERICAN Packing Company's Agreement. KANSAS CITY, Mo., May 20.—The striking firemen of the American Packing plant who went out May 6th for increased wages and fewer hours compromised their difficulties today and lifted the boycott against the company's meats and will return to work tomorrow. A thousand or more employees of different departments of the plant who were laid off because of lack of work will be reinstated. The firemen get an increase of 14 cents per hour for eight hours, practically all they demanded.

POPULISTS to Accept Platform. CHICAGO, May 20.—An Indianapolis special says that the populists of Indiana make the announcement that an understanding has been reached whereby the populists of every state in the union are to accept the platform and candidates of the Chicago democratic convention in case both favor free silver. Negotiations have been going on several months and in accordance with them the national populist convention and national silver convention have been called for the same date, July 22, at St. Louis.

For every quarter in a man's pocket there are a dozen uses; and to use each one in such a way as to derive the greatest benefit is a question every one must solve for himself. We believe, however, that no better use could be made of one of these quarters than to exchange it for a bottle of Chamberlain's Cough Remedy, and Diarrhoea Remedy, a medicine that every family should be provided with. For sale by F. Fleischman, druggist.

WILLCOX. A Prosperous Little City, Full of General Hospitality. La gripe has been on the loose in Willcox for some little time past, and very few have escaped the disagreeable visit. The unwelcome guest is almost banished now, however, and nearly all attacked have recovered.

There is an air of prosperity about the town which is refreshing to a stranger, and investigation reveals the

OVERWORK INDUCED Nervous Prostration Complete Recovery by the Use of Ayer's Sarsaparilla

"Some years ago, as a result of too close attention to business, my health failed. I became weak, nervous, and unable to look after my interests, and manifested all the symptoms of a decline. I took three bottles of Ayer's Sarsaparilla, began to improve at once,

and gradually increased my weight from one hundred and twenty-five to two hundred pounds. Since then, I and my family have used this medicine when needed, and we are all in the best of health, a fact which we attribute to Ayer's Sarsaparilla. I believe my children would have been fatherless to-day had it not been for Ayer's Sarsaparilla, of which preparation I cannot say too much."—H. O. HIXSON, Postmaster and Planter, Kinard's, S. C.

Ayer's Sarsaparilla RECEIVING MEDAL AT WORLD'S FAIR. AYER'S PILLS SAVE DOCTOR'S BILLS.

River and Harbor Committee Disagree. WASHINGTON, May 20.—Conferees on the river and harbor bill have decided to report a disagreement on the Santa Monica and San Pedro deep water harbor amendment. The contention of the house is that in case the committee provided for in the senate amendment should report in favor of San Pedro, it would give that place two large contracts. It is claimed by the house conferees that the commission should report to congress. All other items have been agreed to.

New Hampshire Democrats. CONCORD, N. H., May 20.—The New Hampshire democratic state convention met today to choose delegates at large to the national convention. Harry Bingham presided. He said the platform of the national convention must be broad enough for every true democrat to stand on and its declaration of only one construction. The nominees must be men whose records are in harmony with the platform.

The committee on resolutions submitted its report. The financial plank is as follows: "Under the present conditions there can be but one standard of value, and every kind of currency should rest

on a gold basis." The platform was adopted without dissent.

Seventeen Passengers Injured. SAN FRANCISCO, May 20.—A "Bulletin" Oakland special says a passenger car on the San Leandro & Hayward Electric road jumped the track this morning and that seventeen passengers were more or less injured, some of them narrowly escaping with their lives. None of the passengers were dangerously hurt, their injuries being mostly bruises and cuts from broken glass. The motorman and conductor were the only ones on the car who escaped unhurt.

Murder and Suicide in Los Angeles. LOS ANGELES, Cal., May 20.—It has just been reported at the police headquarters that Chas. M. England, a young attorney who resides in east Los Angeles, killed his wife last night and then committed suicide, the bodies of both being found today. England came from Arkansas and was indicted by a grand jury in that state a short while ago for forgery. He had cleared himself of the charge. He shot his wife through the temple as she lay asleep on the bed and then sat down and wrote several letters to relatives and friends, and a will disposing of his few possessions. He then lay down by his wife's body and shot himself.

South Dakota Delegates Change Front. MINNEAPOLIS, Minn., May 20.—A special to the Journal from Aberdeen, S. D., says: "The probabilities at 2 o'clock are that the gold standard delegates will organize the state convention. They received important reinforcements this morning by the Black Hills delegates who had been for silver, changing right about because of protests from that part of the state. S. A. Ramsey of Woodstock, sound money candidate, was agreed on for temporary chairman. Last night the silverites had matters their own way."

Dr. D. P. Davis, a prominent physician and merchant of Goebes, Va., has this to say on the subject of rheumatism: "I take pleasure in recommending Chamberlain's Pain Balm for rheumatism, as I know from personal experience that it will do all that is claimed for it. A year ago my brother was laid up in bed with inflammatory rheumatism and suffered intensely. The first application of Chamberlain's Pain Balm eased the pain and the use of one bottle completely cured him." For sale by F. Fleischman, druggist.

Forest Fire Raging. CLEARFORK, Pa., May 19.—Forest fires are raging in many places throughout this country. Word was received from McGee's mill this morning that five houses and a church had been destroyed.

At Montgomery the fire are burning fiercely and many houses and barns are in danger. The Barrett hotel at Barrett, four miles from this place, was burned last night. The town is entirely surrounded by big woods which is all ablaze.

In Goschen township more barns and houses were burned last night and many more are in danger.

fact that these prosperous conditions are built upon an apparently solid foundation.

Caspar Hauser, a former resident of Tucson, is the proprietor of one of the best hotels along the line of the S. P.—the Wilcox Hotel. No host could be more accommodating than he; nowhere are beds more comfortable nor more scrupulously clean, and if any delicacies are lacking from the table, it is simply because they cannot be obtained. Everybody is welcome, and it is Mr. Hauser's special delight to entertain Tucson people.

Judge W. F. Nicols, a prosperous lumber dealer, has been chosen justice of the peace, and has proven to the people of that section that he has the ability to wisely unravel the mysteries of the law.

Another gentleman of the same name does a very satisfactory drug business. There are four well kept, orderly saloons, one of which is kept by George Raum, who has an enviable reputation as a jovial, wholesome, royal entertainer.

George King is the efficient, accommodating postmaster of Wilcox, and in addition to his duties in the office, which he holds regardless of political changes, he is proprietor of a well kept notion store. Mr. King is also an old Tucsonite. He is at present in the east, the first time in many years. He is engaged in the settlement of his mother's estate. During his absence the business affairs under his control are very ably managed by his estimable wife.

There are very every reason to anticipate a prosperous future. Here will be the headquarters of the famous Pearce mine, and this will be a well kept egg under which will gather many other adjuncts to business advancement.

HORRIBLE ACCIDENT. Henry Hoback Falls One Hundred Feet Down a Shaft.

Hon. Thos. E. Baker and Mr. Frank Brownell, came in from the Mohawk mine last night, having in charge Henry Hoback, a young man about 25 years of age, who met with an accident yesterday, which, in all probability deprive him of his life.

Mr. Hoback was employed in the Mohawk mine, running a car, taking out ore for the mill. The working shaft in which he was operating is a double compartment, and contains three levels, the top, two, and three hundred feet. He was in the one hundred foot level of the north shaft, and came pushing his car to the shaft, expecting to meet the car there. However, the cage was not there and the car fell down the shaft, he falling after it. At a distance of fifty feet the car lodged upon the timbers between the first and second level, and Mr. Hoback was thrown over the south shaft and fell fifty feet further, striking the south cage at the 200-foot level. He was rescued from this position and taken on top. Dr. Foster has the case in charge and will probably not be able to say positively for the next 24 hours, whether or not he can live. His right thigh is broken; he is terribly out and bruised, and it is thought he has sustained severe internal injuries, which can only be ascertained after a careful examination.

Mr. Hoback is of German parentage and formerly resided at Naples, Indiana, where his mother still lives. He has the reputation among those who know him best, of being an honest, industrious, good hearted, hardworking fellow, and the sympathy of every one is extended him in his present misfortune.

County Records. The following papers were filed for record in the office of the county recorder during the past twenty-four hours:

Deed from Jose Marical to Francisco Barreto, for lot 5, block 30, Tucson, consideration \$50.

Tiger mining location, in the Growler district, by Leon Le Fevre.

Cattle brands by Cruz Baruel, Merced Rodriguez and Alberto Amado.

Rubber Company Attached. NEW YORK, May 20.—Dresser & Goodridge, commission merchants, have attached the Goodridge Rubber company of Newport, R. I. for \$168,000.

Heavy Gales in England. LONDON, May 20.—Violent gales have prevailed along the coasts and shipping at Hull has suffered considerably. A large vessel was driven ashore near Port Patrick, Scotland, this morning. It is feared there has been a great loss of life.

Sentences Commuted. PRETHERIA, May 20.—The sentences of the leaders in the Johannesburg reform movement it was announced today will stand over for the present and meanwhile the sentences of fifteen years imprisonment has been substituted for the sentences of death imposed upon Col Rhodes, John Hays Hammond, Lionel Phillips and George Farrar. Nine other prisoners are discharged and eighteen were sentenced to five months imprisonment, and 22 to 3 months imprisonment.

River and Harbor Committee Disagree. WASHINGTON, May 20.—Conferees on the river and harbor bill have decided to report a disagreement on the Santa Monica and San Pedro deep water harbor amendment. The contention of the house is that in case the committee provided for in the senate amendment should report in favor of San Pedro, it would give that place two large contracts. It is claimed by the house conferees that the commission should report to congress. All other items have been agreed to.

New Hampshire Democrats. CONCORD, N. H., May 20.—The New Hampshire democratic state convention met today to choose delegates at large to the national convention. Harry Bingham presided. He said the platform of the national convention must be broad enough for every true democrat to stand on and its declaration of only one construction.
